

## Building Blocks Tool Kit

Exalenz is committed to bringing advanced, accurate and convenient *H. pylori* breath testing technology. As part of this mission, we offer comprehensive support, including local sales and service professionals, a 24x7 call center, and clinical and informational resources.

To help you optimize the implementation of the *BreathID<sup>®</sup> Hp* System, Exalenz offers the **Building Blocks Tool Kit**. Below is a sampling of the kit components:

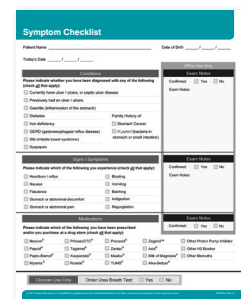

### Patient Pamphlet & Wall Poster

For your waiting room and exam rooms, informational pamphlets and wall posters help prompt patients to mention symptoms, conditions and medications – and explain that an accurate, convenient test is available within your practice.

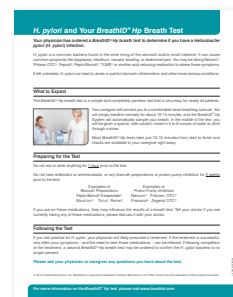

### Symptom Checklist

This worksheet is designed to help ensure the patient has notified you of a wide range of GI-related symptoms, medications and conditions – to help determine whether an *H. pylori* test is needed or not.

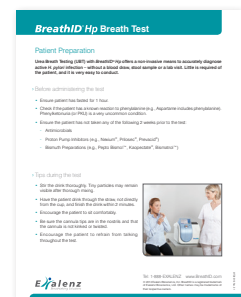

### Patient Instruction Sheet

Offering a description of the 10 -15 minute *BreathID<sup>®</sup> Hp* test and instructions for preparation, this sheet helps patients understand how simple and easy the test is and ensures patients are ready.

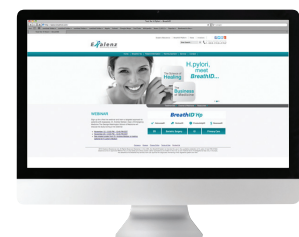

### Patient Prep Sheet

This brief guide is a resource staff members can refer to following the initial training by Exalenz. It provides simple tips for successfully performing the *BreathID<sup>®</sup> Hp* test.

### Communication Templates

An array of tools to help you communicate the availability of the *BreathID<sup>®</sup> Hp* test to patients, staff and the community are available on our website: [www.breathid.com](http://www.breathid.com), under the Resources tab.
